ILF The Boston Mull of Tuesday, has an excellent article on the Public Schools of that city, and the practice of uttempting to educate buys in many of the higher branches, while some of the sim pler, more useful and practical kinds are sadly fieglected. It says,-

After Mr. Mann and electrified the Atter Air. Mann and electrified the State, and had gotten up an Education-al Revival in the State, the hidigantion of our citizens at the manifest inferiori-ty of mast of our Common Schoolmasty of most of our Common Schoolmaters, became so great that the mosters had to begin to study in order to avoid being turned out en masse.—Then came the days of forced rivalry—bitter feeling and universal humbug—the days when men who never understood English Grammar and who obtained places, by favoritism though ineapable of explaining an example in valgar fractities, pretended to teach Thymology, to girls after years old, and alcebra to hope who ten years old, and algebra to hoys who were ignorant of long divising I. A good many of the old stock yet remain on hand, ambued with the old feeling—full of the old humbug—and laboring under the old inchpacity

Again it says,

Again it says, "1 " ... gebra and Physiology to write us an letter from the country we find the said letter awarming with errors of graninar and spelling I We find our model scholare going to the High School for exumary going to the High School for exhibitation—and find every other one rejected as knowing "nothing." And we may be sure that they know "nothing" if the teachers of the High School say 100—for about that school there is no hundred. humbug. Last year one hundred up-plicants appeared of whom 60 were This year there was a simieiecled. r result with an additional display of ignorance and incompetency on the part of those who had been recommended by e Grammar Musters. Now this ming be accounted for in three ways.

All these remarks are very just -During the last two years we have heard many complaints in regard to scholars from our Public Schools ; after leaving School and cutering stores a number have been found sadly defirient in writing and spelling. Now if the time which is devoted to Singing, for instance, was occupied by writing, it would be much better. It is a matter of no importance as to whether boys know how to sing ; at best, they hearn but litthe in this department, and whatever knowledge they may obtain, of this kind, will be of no practical benefit. I bel ringing be abolished, and the time oc cupied in more useful and valuable pursuits, and then our Public Schools will sand forth better scholars, who will be more appropriately qualified for whatev or business they may undertake.

Very much of the success of Newton depends upon the accommodation and conveniences afforded strangers visiting our delightful and unsurpassed summer resort; among them, not the least important is the Yncht House, on the hill opposite the Atlantic, House, kept by Downing, of New York; his house tidy, neatly fitted up with brussels, Carpets, French China, silver and the like, pleasing to the eye, and inviting to those accustomed to taste and refinement; but n' auperior recommendation is the quality and manner in which he prepares a dinner, or serves a Game or Oyster supper. Give him to call; we pledge satisfaction to all who may heed our advice. A party of Ladies and gendemen from Philadelphia, Easton, Pa., Bultimore and Boston sa down, a lew evenings ago, to a supper table arranged by Downing, in one of his parlors, which surpassed in elegance even his usual faste; the good things arranged up and down the centre of the table were encircled with splendid bou quete corresponding in number with the number of guests; the bauquets were tastefully elevated on each plate forming a wall of howers; the merry peals of joy which burst forth simultaneous with sweet soft Music from the Germa nia band, which was stationed in an ad joining parlor, made it a merry, merry night, long to be remembered by the happy participants.

IT There will be a llop at the Ocean House this evening; a brilliant time je anticipated. ....

DEATH OF MRS. GEN. TAYLOR .- The telegraph informs us of the des Mrs. General Taylor, reliet of the late President of the United States. She dien at Cast Paecugouls, Mier., on Saturday, evening last, Blid was a native of Culvert county, Maryland, her tamlly name being Smith. She leaves a nuinher of relatives, we believe, residing on the Rostern Shore of this State. Thus has passed away a venerable woman, who had long been the boroin companion of one of the most tried patriots and eminent soldiers of the fand.

to The grand Fancy Ball at Saratoga takes place this evening.

UP Saturday was the 418th annivererry of the invention of printing.

BF General Scott is very popular with the masses of the Northwest. The Detrait Advertiser hears avery day of men who have usually voted the Democratic ticket declaring their intention of going for Scott at this election. The Adyertiser expresses a settled belief that Michigan, Indiana, and Wisconsta are sure for him. . . .

POSTMASTER-GENERAL HALL - The nomination of Nathan K. Hall, Postmuster-General, by the President, for United States District Judge, in place of Judge Conkling, cannot full to be halled with satisfaction by the people and by members of the bar throughout the Union. Mr. Hall is one of the ablest lawyers of western New York, and his new post can lend him no grace, he will not give it back."-Boston Transcript.

CAUTION TO LETTER-WRITERS. The Supreme Court of New Hampshire has given a judicial exposition of the law on the subject of love-letters, by instructing a jury, in a recent case, that where a written correspondence is kept up between an unmarried young lady of suitable age, who is not his relative, the most common and natural inference is, that it is upon matrimontal subjects .-Young marriagentile ludies, or least prodent ones, do not allow themselves to be engaged in a correspondence with unmarried men, unless they suppose a murriage contract exists between them. And unmarried men do not desire that such a correspondence should be cartied on where an engagement does not exist, unless it be from some improper motives, or with the hope and expectation of an ultimate engagement. If these instructions are to be taken as law in other States, all sentimentalities, not looking to matrimonial conclusions, totween unmarried persons of opposits rexes, will have to assume an oral char-.ter.-

PERPETUAL LIGHT.-A most curious and interesting discovery, has been made at Laugres, France, which will rause scientific inquiry as to the mater ial and properties of the perpetually burning lamps, said to have been in use among the uncients. Workmen were recently excavating for a foundation for a new building in a debrie, evidently remains of Gallo-Roman erection, when they came to the roof of an undergrown sort of cave, which time had rendered almost of metallic hurdness. An opening, however, was effected, when one of the workmen instantly exclaimed that there was light at the bettom of the cavern. The parties present entered, when they found a bronzed sepulchial lamp of remarkable workmanship, suspended from the roof by chains of the same metal. It was entirely litted with a combustible substance, which did not appear to have diminished, although the probability is the combustion has been going on for ages. This discovery will throw some light on a question which has caused so many disputes among learned untiquaries; although it is stated that one discovered at Viterbo, in 1850, from which, however, no fresh information was allerded on the subject.
